

A stylized graphic of a globe is positioned on the left side of the slide. It is composed of several overlapping, light blue curved lines that form a grid-like pattern, representing latitude and longitude lines.

IAGC/OGP Joint Global HSE & Security Forum

OGP News

Houston, 15-16 April 2014
Hosted by Chevron

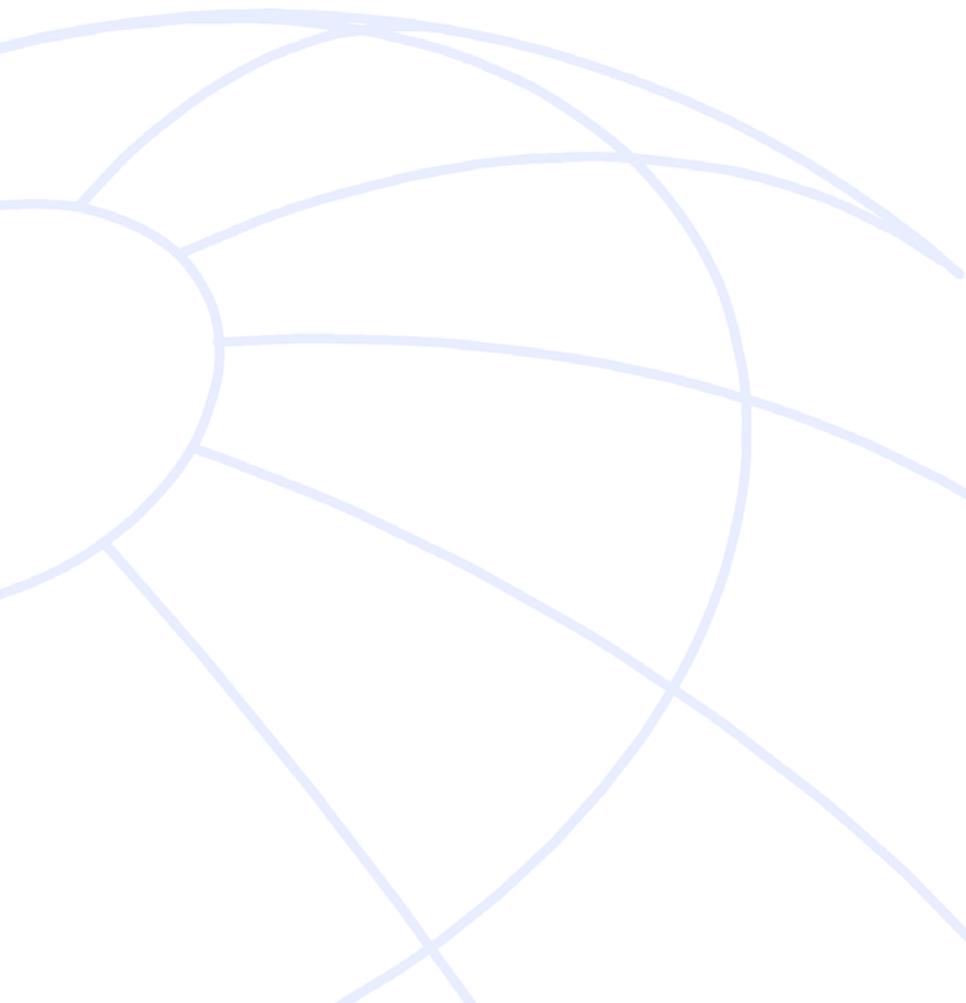

- **OGP works in two ways, publications and advocacy.**
 - **Association-branded reports and guidelines** earn OGP stakeholder respect and provides a firm foundation for advocacy work.
 - **Five key advocacy issues:** offshore well safety, process safety, the role of oil and gas in the energy mix, sustainable Arctic operation and progress in decommissioning.
- **EGM, Berlin – November 2013**
 - 2014 Business Plan and Budget approved
 - Re-branding OGP (work in progress)
- **EGM and AGM, Houston – May 1st, 2013 - Main topics**
 - Offshore Safety
 - Shale Oil and Gas
 - Process Safety
 - Arctic Oil Spill Response

- **Link: <http://publications.ogp.org.uk/>**
- **Crew Resource Management for Well Operations teams, Report 501, April 2014**
- **Implementing an in-vehicle monitoring program, Report 365-12, March 2014**
- **Managing psychosocial risks: a guide for expatriates in the oil & gas industry, Report 495, December 2013**
- **Process Safety Event - 2011 and 2012 data, Report 2012p, December 2013**

- **Prevention of heart attacks & other cardiovascular diseases**, Report 491, September 2013
- **Mutual aid - A global framework for the offshore oil and gas industry**, Report 487, June 2013

Other OGP News

- **Creation of an Arctic Committee, October 2013**
- **Creation of a Subsea Task Force, February 2014**
- **EU Offshore Safety Directive; consultation of the Industry (OGP, IADC, IMCA) by EUOAG on development of the Common Data Reporting Format 'implementing act'** (Major accidents related to offshore oil and gas operations)
- **International standards; the broad picture** (source API-OGP Task Force): More and more standards are diverging between API & ISO documents (Alf Reidar Johansen <Alf.Reidar.Johansen@ogp.org.uk>)

SAFETY Committee Parent Committee to Geo HSSE

EGM

Looking ahead to 2014...
Berlin, November 2013

What does the Safety Committee do?

- ❑ Promotes the integration of safety into the everyday business of OGP member companies and contractors
- ❑ Promotes a level playing field for safety that:
 - is recognized by the E&P industry and by national and global regulatory authorities
 - enhances the E&P industry position on safety issues of world-wide significance.

Opportunities to seize Challenges to overcome in 2014

- **Opportunities**

- Publication of the **Operating Management System** guideline is an essential contribution in promoting good practices.
- Develop an **integrated approach** to individual operations management guidelines within the OMS framework. Assess performance of “industry” in regard to **prevention of major incidents**. Initiative lead by Brett Doherty, Safety Committee Vice-Chair.

- **Challenges**

- Develop **Competence** management and assessment guideline
- Improve HSE culture with development of **Crew resource management** recommended practice

How we will meet our challenges and maximise opportunities in 2014

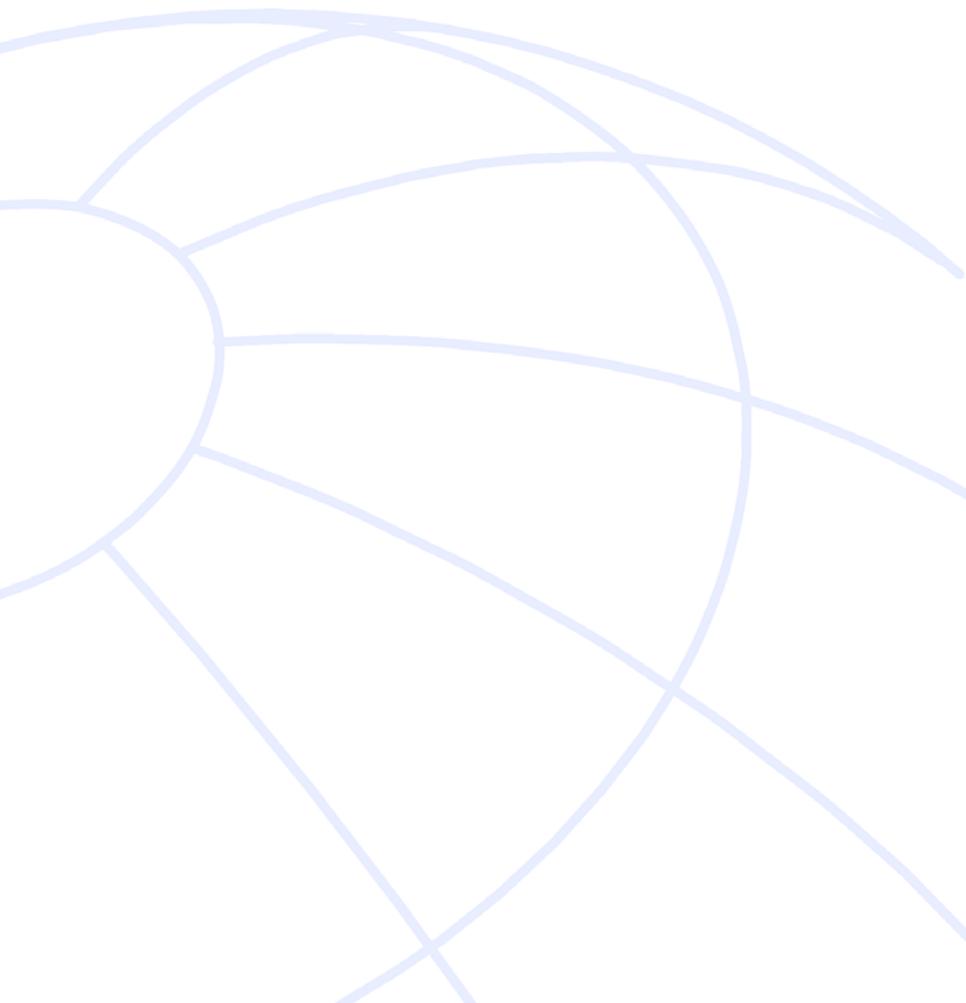

- **Operating management system:**
 - Develop a **communication** plan and maintain a TF or network (work in progress);
- **Assess performance of “industry” in regard to prevention of major incidents**
 - Building on the publishing of the first **OGP PSE report**, 2012p
 - Development of methods of **reporting in process safety** with e.g. aviation, diving, and well operations;
- **Competence management and assessment**
 - Achieve **consensus** about the need for guidance and for the Safety Committee to own it; to establish a TF (work in progress)

What we will deliver in 2014

- **Process Safety Sub-Committee**
 - Update of Report 456, *Recommended practices on key performance indicators*
- **Geophysical SC**
 - *Geophysical contractor management system self-assessment (GCMSA) tool*
- **Aviation SC**
 - Reformatting of *Aviation Management Guidelines (AMG)*.
- **Temporary Accommodation TF**
 - *Design and operation of temporary accommodation, guideline*
- **Competence**
 - *Crew Resource Management Recommended Practices*
 - *Competence management system for O&G operations Personnel, recommended practices*

SAFETY COMMITTEE Highlights

- **A second Vice Chair has been appointed, Brett Doherty of Rasgas.**
- **October 2013 meeting, first 'Safety Committee governance meeting'.**
- **October 2013 meeting, focus day on 'Changes Three Years after Macondo'; a work group was created to deal with major risks and their related safety barriers in the E&P industry.**
- **April 2014, focus day: "Major risk: the route towards the 30 key safety barriers for the E&P industry"**

HEALTH Committee

On-going and future work

- **A guideline for conducting and reporting on fatigue risk assessments**
- **Fatigue in workers fly-in and fly-out**
- **Pandemic/infectious disease outbreaks**
- **Occupational Health and Hygiene Subcommittee**
- **Alcohol & Drugs management**
- **Started discussions with Safety Committee and Security Committee on a possible multiple casualties/disaster management document**

ENVIRONMENT Committee

5-Year Strategy 2014-2018

Established in November 2013

OGP Environment 5 Year Strategy (2014-2018)

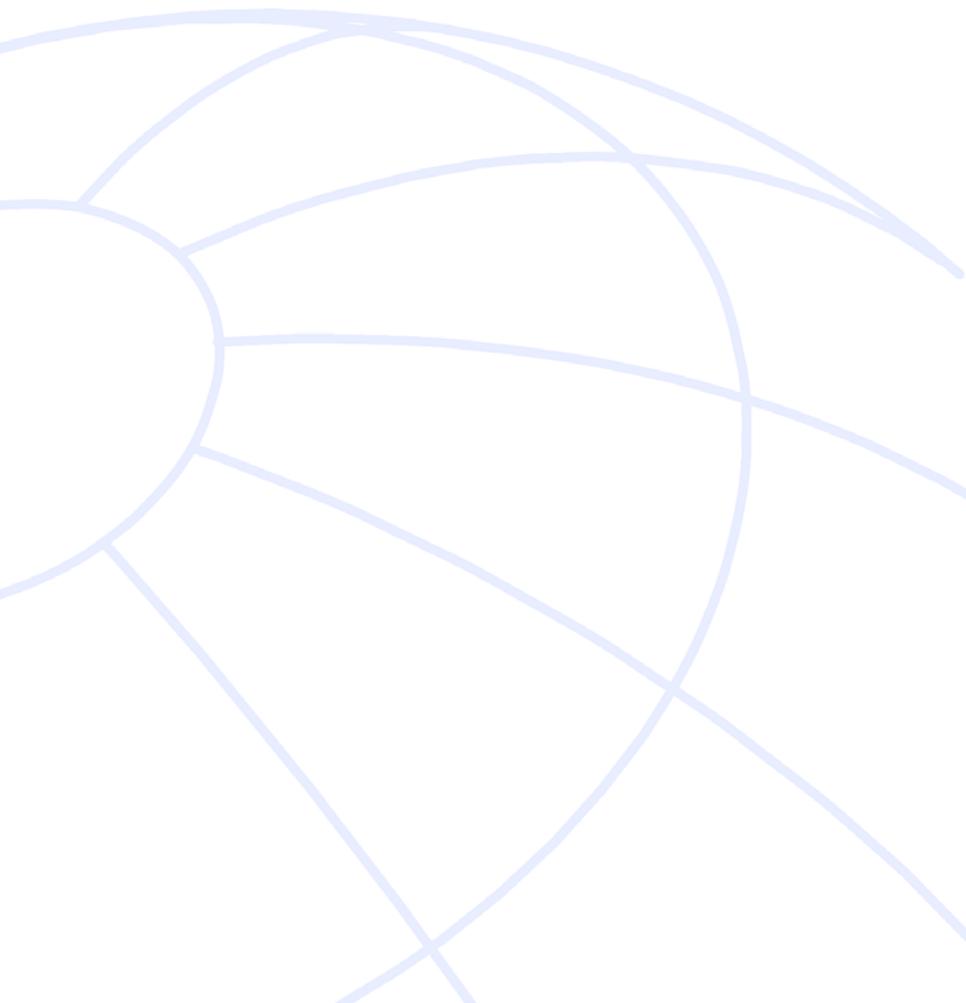

- **We will collaborate with others on:**
 - OGP Arctic Committee.
 - Arctic Oil Spill Response Technology JIP (managed by OGP but commissioned originally by the IPIECA Oil Spill Working Group) (due to end in 2016).
 - OGPO/IPIECA Biodiversity and Ecosystem Services Working Group.
 - Gas from Shale Task Force.
- **We will stop:**
 - ESHIA (Environment, Social & Health Impact Assessment) Task Force (YE 2013).
 - Arctic Environment Task Force (2Q 2013).

OGP Environment 5 Year Strategy (2014-2018)

- **We will start:**
 - A new Task Force will conduct a workshop on Maritime Spatial Planning (including protected areas).
 - New activities related to First Tier Topics (and potentially Second Tier Topics) with access implications as warranted.
 - New activities arising from interactions and cooperation with other OGP Committees/Sub-committees/Task Forces and other industry associations (e.g., API, CAPP).

SECURITY Committee

- **Security Management System**, ready, awaiting for OMS
- **Guidelines for Security Planning in Remote Locations** - 496
- **Security considerations during the operational project lifecycle** with ManCom
- **Guideline for the initial management of security incidents in remote oil and gas facilities**
- 497
- **Security KPI's / measurement** work in progress
- **"Managing Kidnaping Risks" guideline** work in progress
- **Information Security Guideline** work in progress
- **Security of Shale operations guideline** work in progress
- **Security Risk Assessment** – will start soon
- **Guard Force Management** – will start soon
